

A photograph of an outdoor dining area. In the foreground, a round wooden table is set with a white plate, a glass, and a folded napkin. A green lantern with a warm light is on the table. A green plastic chair is visible behind the table. In the background, there is a brick wall and a small tree. The word 'tala' is written in the top left corner.

LIGHT TO LIVE BY

We create high-quality, sustainable LED lights for homes, offices and every space in between. Lights people can be proud to switch on because they look great, lift the soul and are gentle on the planet.

THE CREATORS OF BEAUTIFUL, SUSTAINABLE LIGHTING.

Tala was founded in 2015 by Josh, Max and William. Three university friends who believed great design was the fastest way to a low-carbon planet. Since then, we've become one of the leading lights in design-led, sustainable lighting.

A team of engineers, designers and low-carbon pioneers, proud to be creating lights that are gentle on the planet, make homes look great and make life feel brighter.

We push the boundaries of design x technology

Our LED bulbs are built with performance and impact in mind.

With every product we design, we're driving our industry closer to a low carbon future.

We draw inspiration from nature

Tapping into 4.5 billion years of research and development as a platform for creativity and innovation.

We build sustainability into every product

Low energy is good. Low carbon and low impact is better. Circularity and repairability are the future.

We collaborate

Working with like-minded folk brings an energy we thrive on. We work with others who believe in the positive power of sustainable lighting. We're the preferred LED light-source supplier for some of the most celebrated lighting brands worldwide.

We choose suppliers with integrity

We choose responsibly sourced, recyclable materials like aluminium and hardwoods. We avoid plastic at all costs.

DESIGN-LED LIGHTS FOR A BRIGHTER FUTURE.

**We're supporting
the move to low-
carbon. One light
at a time.**

- Tala LED bulbs use 90% less energy than incandescent equivalents
- Tala LED light sources have a lifespan of between 15,000–30,000 hours, or approx. 5–10 years in a residential environment
- By using Tala LED bulbs rather than incandescent or halogen equivalents, users can prevent significant amounts of CO₂ from entering the atmosphere. Moreover, the efficiency and longevity of Tala bulbs will help to reduce energy bills and lower the users' carbon footprint
- Tala fixtures use responsibly sourced and recyclable materials, such as hardwoods and aluminium

AMAZING PRODUCTIONS AND FRAMPTON & BALDING

As designers we naturally want to create the best looking lights on the planet but that's just half the story.

Through every product we make, we want to use the power of design to show how brilliant low-carbon living can be. The low energy revolution is happening. We're proud to be leading the charge.

#AtHomeWithTala

We encourage our customers to share photos of their Tala lights.

TALA PROFESSIONALS

A growing online resource for our professional customers, we provide access to our latest product inventory, exclusive downloads and order insights with automatic trade discounts.

Complete with a special 'Tala Toolbox', you can tour our library of assets and resources without needing to request them, and if you can't find what you're looking for, we have a dedicated team of Sales experts who can help you get what you need.

Contract

We work directly with world-class lighting designers and architects to install Tala lights on landmark projects in the residential, commercial and hospitality categories.

Peruse our curated inspiration pages to spark ideas or showcase to clients

Read our project case studies to see how architects and designers have used Tala

Download 3D models to design with Tala for your next project

Partnerships

We partner with leading brands and makers to design, engineer and manufacture high-quality, high-performance LED light bulbs.

THE MUSE IN SOLID BRASS

The Muse in Solid Brass is a special edition of the original portable lamp design.

Celebrating of the beauty of raw materials, the lamp is made from cast solid brass which is hand-polished to achieve the luxury finish. Its considerable weight lends a further air of luxury.

The first version of The Muse to be made without Farrow & Ball's custom colours, this edition references the signature brass finish found in other Tala fixtures, while creating something wholly unique.

edition**

THE MUSE

TALA X FARROW & BALL

The Muse is a collaboration between two pioneering and sustainable British brands, mixing exclusive Farrow & Ball colours with Tala lighting technology.

The Muse recalls the promise and grandeur of the British pleasure garden to create a timeless lighting solutions for the home, outdoors, or on the move.

tala

“Just like the Muse itself, the colours have been designed to stand the test of time and to feel instantly at home wherever you set them down.”

- CHARLOTTE COSBY, HEAD OF CREATIVE AT FARROW & BALL

THE MUSE

The most advanced portable LED lamp on the market, The Muse has a battery life of up to 24 hours and delivers a warm dimmable light throw no matter the weather.

- Tala's first truly portable lamp
- Exclusive Farrow & Ball colourways
- IP44 rated – built for the British outdoors
- Classic lantern aesthetic
- Cordless long-life battery (up to 24hrs)
- Custom solid brass dimmer with knurled texture
- Dim to Warm LED light
- Repairable for longer life and less waste
- USB-C + Wireless charging
- IP44 wet-rated for outdoor use
- Replaceable Tala bulb and battery pack
- Borosilicate glass, Aluminium shell and solid Brass hardware
- CRI 97 LED light

THE MUSE

THE MUSE WALL LIGHT

An extension of the portable lamp series, The Muse Wall Light continues the aesthetic theme and recalls the sconce-style light fixtures synonymous with the 18th and 19th Centuries.

The Dim to Warm behaviour of the bulb can be controlled via the rotary dimmer dial on the face of the lamp, or by switching to wall control upon installation.

- IP44 wet-rated – suitable for outdoors and bathrooms
- Replaceable custom LED bulb
- Dim to Warm technology
- Cast aluminium housing and solid brass detailing
- Dimmable using the knurled brass dial, or from a centralised system (configurable upon setup)
- Four custom Farrow & Ball colourways

KILTER

KILTER

Named in reference the delicate confluence of the linear light source and central pivoting fixture.

The Kilter Wall Light fixture is available in White and Dark Grey enamel finishes, while the Kilter bulb is Tala's first entry into S14d-style light sources, available in 500mm and

640mm sizes, as well as 2200K and 2700K.

IP44 wet-rated – ideal as a bath bar or vanity light, and for outdoor use.

ALUMINA PENDANTS

An extension of the Alumina Lamp series released in November 2020, the Alumina Pendants also draw inspiration from the White City in Tel Aviv.

For the pendant edition, the five colourways of the Lamp series were narrowed down to the popular and versatile 'Chalk' finish, referencing most closely the classic curved design and white surface finish of the architecture.

- Built from lightweight aluminium
- Complete with textured chalk white powder-coat finish
- Grey and white speckled braided cable
- Designed with a concealed neck to sit flush to the custom Sphere V bulb
- Available in Single, Triple and Nine Pendant configurations
- Also available as a standalone fixtures
- Ideal in minimal or bold interior settings

ALUMINA NINE PENDANT - CHALK
CP-CHK-SET-NON-ALM-01-EU / CP-CHK-SET-NON-ALM-01-US

ALUMINA

“We combined a soft chalky texture with clean geometry to highlight the delicate relationship between bulb and pendant.”

- DANIEL CARPENTER, SENIOR DESIGNER

ALUMINA

Shaped from a solid cylinder of aluminium, the bold form is balanced by the modest, chalk-white finish, enabling it to be displayed in minimal spaces or with striking colour schemes.

Designed with a concealed neck to showcase the form of the new Sphere V bulb and its in-built Dim to Warm technology.

ALUMINA LAMP

This modern and multifunctional lamp offers certainty for uncertain spaces. Suitable for use as a table or wall light, the Dim to Warm characteristics of the bulb and the tactile nature of the lamp gives this the edge in any interior.

- Plug-in and portable
- Made from lightweight aluminium
- Five colour options
- Functional as a table or wall light
- Bauhaus-inspired aesthetic
- Lamps come pre-packed with Sphere IV bulb
- Integrated full range dimmer
- 3m cord length

ALUMINA

+ Wall Mountable

ALUMINA LAMP - SAGE

ALM-SPHR-IV-SGE-TBL-01-EU / ALM-SPHR-IV-S

Alumina is made from lightweight aluminium, which has excellent recyclability potential and is one of earth's most abundant metals.

ALUMINA

GE-TBL-01-US

Catering for the modern dweller, we adapted the design to allow users to fix their lamp to the wall.

In doing so, it offers a multitude of uses and the ability to display Alumina throughout an interior space.

- Easy installation
- No need for hard wiring
- Perfect for accenting a room

POISE

POISE

Featuring an integrated full range dimmer to extract the maximum performance from the mouth-blown Sphere V LED bulb, custom-made for this light feature.

- Adjustable, telescopic column with central tightening clutch
- Minimum height of 1245mm to maximum height of 1700mm
- Base and stem made from black powder coated steel
- Available with Brass or Graphite detailing on neck, clutch and base
- Integrated, full-range dimmer on stem
- Includes the new Sphere V LED bulb (G200) – our largest Dim to Warm bulb to date
- High performance Dim to Warm technology
- 3 metres of black braided cable and EU-UK plug adapter

BASALT

+ Designed to evoke nature's magnitude

BASALT

Drawing from millions of years of organic construction, the Basalt range references the shape found in the thousands of extruded basalt columns that make up the Giant's Causeway in Northern Ireland.

Through expertly crafted Brass and Stainless Steel, together with mouth-blown borosilicate glass, Basalt achieves a truly unique aesthetic to accompany its arcane origin story.

- Crafted from sand casted Brass and lost-wax casted Stainless Steel
- Matte glass translucent borosilicate glass bulbs
- Consistent colour rendering of more than CRI 90

DAVID WEEKS FOR TALA

**For our seminal
international design
collaboration, we have
conjured a series of
lighting concepts with
legendary New
York designer, David Weeks**

Known as the 'godfather of New York lighting design', David Weeks's minimalist visual language articulates an ongoing, and open-ended, dialogue between material and form. Together with our London-based design team, this collaboration marries New York modernism with British ingenuity, casting our most celebrated bulbs in a whole new light.

ECHO

Echo is all about structure and form. Inspired by our Sphere IV bulbs, the Echo range is notable for its strong, angular steel framing. Featuring a Table and Floor lamp, plus a dramatic and elegant Chandelier, this range will soon sit amongst the very best lighting designs.

- Refined tubular steel structure
- Custom rotary dimmer
- Dim to Warm technology
- Echo products come pre-packed with Sphere IV bulbs

- **ECHO TABLE LAMP**

- I2. VORONI LP-WHT-SET-BP-02-EU / LP-WHT-SET-BP-02-US

NINE PENDANTS

This dramatic and decorative light fixture combines nine signature Tala pendants and bulbs, all housed in a large ceiling canopy.

Designed to create maximum impact with minimum fuss, the Nine Pendant is ideally suited to illuminate stairwells, hallways and entrance spaces.

- Pre-assembled with Brass, Graphite, Oak and Walnut pendants
- Complete with 5m/16.4ft black braided cable, adjustable to suit any space
- Large Canopy plate is available in Oak, Walnut, Brass and Black Ash finishes
- Available as standalone fixtures or pre-paired with Voronoi II or Sphere IV LED bulbs

**The light bulb is
the protagonist**

THE LIGHT BULB

Light is a kind of energy. As part of the electromagnetic spectrum, it is a primary tool for perceiving the world and communicating within it.

We see every product and every story through the prism of the light bulb. It is the first consideration and the last.

Save money and time

Use less energy and spend less time replacing bulbs

Experience smooth dimming to <5%

We are pursuing perfection in Dim to Warm technology

Unique shapes and stories

Our most popular bulbs are hand-assembled using mouth blown glass

Prevent carbon emissions

Each Tala bulb can prevent the emission of 0.3 metric tonnes of carbon

Achieve true colour representation

We consistently achieve CRI 95

Produce less waste

We celebrate the retrofittable bulb, so no fixtures need to go to landfill with integrated electronics

VORONOI

Designed to push the design of the light bulb to its limits, the Voronoi range is Tala's most recognisable and celebrated light source family.

Taking inspiration from the intricate patterns found in nature, the three Voronoi bulbs are now an iconic feature of our lighting collection.

- Mouth-blown glass
- Hand-assembled LED filaments
- No two bulbs the same
- Original patented design

SPHERE

SPHERE

Available in five distinct sizes – 50mm, 75mm, 100mm, 150mm and 200mm - the Sphere family of bulbs will provide a perfect lighting solution for almost any fixture.

Ranging between 4.6 and 8 Watts, and achieving 250-680 Lumens, these bulbs provide smooth and strong light output, with limited energy use.

Dimming from warm light in the morning to cool light in the afternoon helps you attune to your daily activities.

As night closes in, dim down to warm light again to relax into the evening.

+ Engineered for perfection

TECHNICAL LIGHT SOURCES

Drawing on the engineering excellence that defines Tala's core offering, the Light Engine range, as well as the GU10 and G9 light sources, represent the pinnacle of technical LED light sources.

- Light Engines offer high power Dim to Warm light at CRI 95
- G9 and GU10 provide gallery grade lighting at CRI 97, R9 90-97
- GU10 offers Dim to Warm light at 2200-2800K
- All dimmable and exhibit <5% flicker
- Suitable for enclosed fixtures
